# MEDIA RELEASE

FOR IMMEDIATE RELEASE:

June 28, 2017

## **FLOOD WARNING FOR BAY OF QUINTE AND LAKE ONTARIO SHORELINES IN THE QUINTE CONSERVATION WATERSHEDS IN EFFECT UNTIL THE BEGINNING OF AUGUST**

Water levels on Lake Ontario and the Bay of Quinte have been gradually decreasing since the water levels peaked at the end of May. Quinte Conservation Water Resources Manager Christine McClure says, "It is expected that water levels will continue to decline throughout the summer. However, wind, waves, and widespread heavy rainfall can create short term higher water levels along shorelines, like those experienced over the weekend."

McClure adds, "The high water levels caused shoreline erosion and debris to accumulate along shorelines."

Shoreline residents are encouraged to contact their local municipalities for information on the proper disposal of sand bags and debris. Sand from sand bags should never be disposed of into waterways or within areas that experienced flooding.

Shoreline residents are reminded that any work near the water will require a permit from Quinte Conservation and should call the office or visit the website for more information. Quinte Conservation staff can provide advice on shoreline protection.

All residents near flooded areas should take care during flooding conditions. Floodwater may be deeper than it appears and often contains hidden snags and debris. Parents and caregivers should keep children well away from floodwaters. They are not safe for wading.

Quinte Conservation encourages residents experiencing flooding to report their conditions and seek shoreline protection advice using an online form. The form can be found at:

[https://www.cognitofrms.com/QuinteConservation1/\\_2017LakeOntarioAndBayOfQuinteHighWaterSurvey](https://www.cognitofrms.com/QuinteConservation1/_2017LakeOntarioAndBayOfQuinteHighWaterSurvey) or on the main page of the Quinte Conservation website at [www.QuinteConservation.ca](http://www.QuinteConservation.ca)

Quinte Conservation staff will be monitoring conditions closely.

A Flood Warning means flooding is imminent or already occurring in specific watercourses or municipalities. Municipalities and individuals should take action to deal with flood conditions. This may include road closures and evacuations.

This message will be in effect until (or updated before) Thursday, August 3, 2017.

Quinte Conservation is a community-based environmental protection agency. It serves 18 municipalities in the watersheds of the Moira, Napanee and Salmon Rivers and Prince Edward County. It provides cost-effective environmental expertise and leadership. Quinte Conservation's main goal is to create a sustainable ecosystem where people and nature live in harmony. More information about Quinte Conservation is available at [www.quinteconservation.ca](http://www.quinteconservation.ca).
